

# ENGINEERING WASTEWATER TREATMENT EXCELLENCE

## BIO-BATCH™ SBR

Complete solution using swing-arm decanters or our proprietary vertical-shaft decanters.

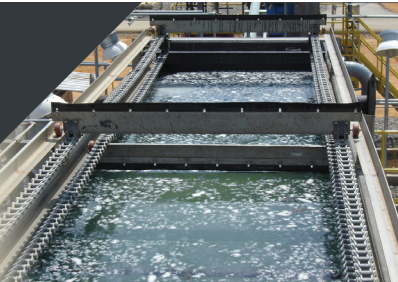

## BIO-ROTOR™ RBC

Modern rotating biological contactor (RBC) for low-maintenance biological treatment.

## DIFLOAT™ DAF

Compact solids separation and sludge thickening including innovative DAF conversion from existing clarifiers.

## CLARIFIERS

Custom designed water and waste-water clarifiers to suit any plant needs.

## BIO-HTX™ SLUDGE HEAT EXCHANGER

Sludge heating or cooling with unmatched heat transfer efficiency with low head-loss.

## EXTENDED AERATION SYSTEMS

Biological treatment process with high effluent quality and low O&M requirements.

## WORKING WITH NAPIER-REID IS EASY AND EFFECTIVE

1 We walk you through what project details we need. Contact us via [napiers-reid.com](http://napiers-reid.com).

2 We supply design-ready drawings, proprietary technologies, responsive support, and even install.

3 You never worry about your treatment again.

# ENGINEERING WATER TREATMENT EXCELLENCE

## PACKAGE CONVENTIONAL FILTER TRAINS

Coagulate, flocculate, clarify, and filter in a single tank for a compact footprint.

## GAC (GRANULAR ACTIVATED CARBON)

Removes free chlorine, dissolved organics, odor, taste, color, and synthetic organic contaminants.

## PRESSURE FILTERS

Achieves the highest water quality by robustly removing turbidity, iron, manganese, sulfide, and arsenic.

## MEMBRANE FILTRATION

The ultimate treatment for removal of dissolved contaminants.

## ION EXCHANGE SYSTEMS

Effective technology for water softening, demineralization, and nitrate removal.

## CONTAINERIZED TREATMENT PLANTS

Water treatment packages for most small- to medium-sized facilities.

## DIFLOAT™ DAF

High-rate solids separation including innovative DAF conversion from existing clarifiers.

## FLOCCULATORS

High performance flocculators designed to meet your process requirements.

## WORKING WITH NAPIER-REID IS EASY AND EFFECTIVE
